

# SnapShot: Cancer-Associated Fibroblasts **Cell**

Danielle Park,<sup>1</sup> Erik Sahai<sup>1</sup> and Antonio Rullan,<sup>1,2</sup>

<sup>1</sup>Tumour Cell Biology Laboratory, Francis Crick Institute, 1 Midland Road, London, NW1 1AT, UK

<sup>2</sup>Institute of Cancer Research, 237 Fulham Road, London SW3 6JB, UK

Since 1997, InvivoGen has been fostering the discovery, development, manufacturing, and commercialization of high-quality and reliable reagents to accompany life scientists and encourage cutting-edge bioresearch. Our strong expertise in microbiology and innate immunology allows us to undertake major turning points in demanding domains, including pattern recognition receptor

(PRR) signaling, cytokine signaling, autophagy, and antibody engineering by providing comprehensive collections of cell lines, plasmids, and reagents. As an international leader, InvivoGen's promise is to deliver innovative tools and solutions to support the next breakthroughs in innate immunology. Discover our extensive product range today!
