Loading control antibodies are used routinely to show that equal amounts of different protein samples were loaded into the wells of an SDS-PAGE gel. Selection of an appropriate antibody to detect a protein target whose expression stays consistent under various experimental conditions is essential to make meaningful interpretations of western blot data. Thus, reliable loading control antibodies are of immense importance to the laboratory.

Why Choose GeneTex Loading Control Antibodies?

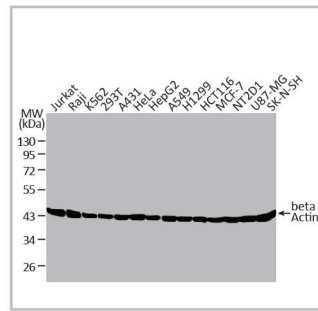

- ✓ Validated in Multiple Species
- ✓ Tested in Various Applications
- ✓ Well-Cited in Publications
- ✓ Products for Every MW Range
